

Certifying country Finland	Certificate N:o
Country of origin of birds	 <p style="text-align: center;">SUOMI FINLAND</p> <p style="text-align: center;">CERTIFICATE OF ORIGIN AND HEALTH for export of hatching eggs or day-old chicks from Finland to the Kingdom of Thailand</p>
Competent Authority Finnish Food Authority	
Organisation in Finland, issuing this certificate	
Name and address of consignor	Name and address of consignee
Means of transport	Country (s) of transit

Import permission: License No: _____ Date of License: _____

1. Identification	
1.1 Breed, species and mark of the eggs or day-old chicks:	1.2 Number of eggs or day-old chicks:
1.3 Sex of the day-old chicks:	1.4 Generation and intended usage (commercial or breeding stock):
1.4 Name and address of the establishment of origin or the hatchery:	
1.5 Names and addresses of the owner/exporter:	

2. Condition items
1. Finland has been free from highly pathogenic avian influenza for the past 12 months.
2. The premises of origin have been free from Newcastle disease, Salmonellosis (<i>S. typhimurium</i> and <i>S. enteritidis</i>), Fowl typhoid and Pullorum disease for the past 12 months.
3. The hatching eggs or day-old chicks come from premises in which avian diseases are under control. The day-old chicks are healthy, fit to travel, and free from signs of any infectious and contagious diseases including ectoparasitism at the time of export.
4. The hatching eggs or day-old chicks originate from an officially accredited pullorum-free flock, in which poultry over 4 months of age have been submitted to two consecutive blood tests, 21 days apart, with negative results. Random sampling has been carried out thereafter to ensure the pullorum-free state. Bacterial culture for <i>Salmonella pullorum</i> , where needed, has been attempted by using approved methods or the methods recommended by the OIE International Animal Health Code.

5. 6 months immediately prior to export, the premises of origin have been free from clinical signs or other evidence of:
Newcastle Disease, Infectious Bursal Disease (Gumboro), Infectious Bronchitis, Avian Encephalomyelitis, Egg Drop Syndrome⁷⁶, Mycoplasmosis (infection with *Mycoplasma gallisepticum* and *Mycoplasma synoviae*), Marek's Disease, Parvovirus Infection, Viral Arthritis, Infectious Anemia, Fowl Cholera, Salmonellosis i.e. *Salmonella enteritidis*, *Salmonella typhimurium*, Fowl typhoid and Pullorum Disease. The hatching eggs or poultry have not been in contact or been exposed to any of these diseases.
 6. The hatching eggs or day-old poultry come from a hatchery of which the management, hygiene and disease security procedures have been approved by an authorized veterinary official, and according to the relevant criteria laid down in the OIE International Animal Health Code.
 7. The day-old chicks: The hatching incubator was disinfected and fumigated prior to hatch. Only fumigated eggs from a *S. pullorum* free - flock were introduced and hatched in the hatching incubator.
 8. The hatching eggs were disinfected prior to dispatch. The day-old chicks to be exported to Thailand were derived from parent flocks continuously resident in Finland and hatched in premises approved for export to Thailand.
 9. The hatching egg or day-old chicks are packed into unused boxes for export and have no contact with other eggs, poultry or birds except those that have similar health status.
 10. Hatching eggs or day old chicks shall come from flocks which: have undergone an animal health examination carried out by an official veterinarian during the 72 hours preceding consignment and, at the time of the examination, have shown no clinical sign or suspicion of contagious disease.
- This certificate is valid for 10 days
