

Outcome indicators: proportion of indicator *E. coli* completely susceptible to antibiotics and proportion of ESBL/AmpC-producing *E. coli* in pigs and broilers 2014-2023.

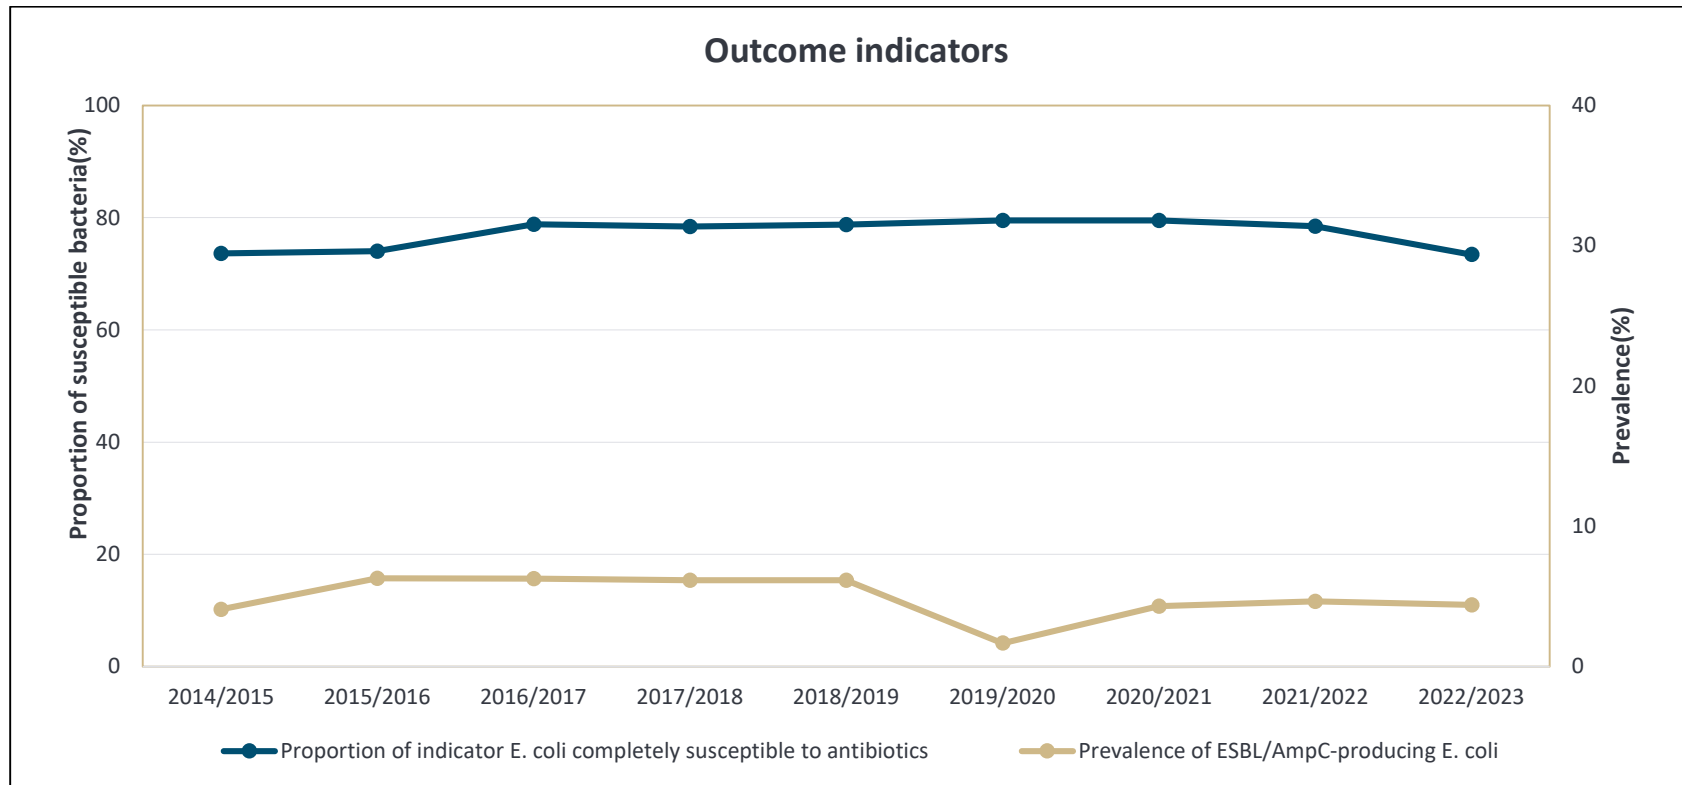

Figure. The proportion of completely susceptible indicator *E. coli* and prevalence of ESBL/AmpC-*E. coli* isolated from pigs and broilers within the FINRES-Vet programme 2014–2023. The size of the food-producing-animal population is included in the calculations. (Source: Finnish Food Authority).
